# IMAGE GALLERY

your software solution for  
research and teaching

## WHAT IS EASYDB.UNIVERSITY?

**easydb.university** is a web based digital image gallery system of the newest generation - tailored to the particular needs of universities and research institutes.

## WHY EASYDB.UNIVERSITY?

**User-friendly, intuitive and easy to use, as well as securely accessible from any place in the world:**

- **Record** assets from your digital library with a professional system.
- **Tag** your pictures and other digitized media, either by predetermined standards or by individual classifications.
- Do **research** in your portfolio and review your geo-tagged results on e.g. Google Maps.
- **Connect** with easydbs from other faculties or universities.
- **Assemble your project pictures in collections**, share them with colleagues and students, or selectively make them accessible to the public.
- **Present** you pictures side by side for direct comparison in lecture halls and seminar rooms.

## YOUR SOFTWARE SOLUTION FOR RESEARCH AND TEACHING

**Convince yourself of the modern features of easydb:**

- **Change** the user interface and the data model to your individual needs with help of easydb creator. Enjoy the flexibility in freely arranging categories, lists and thesauri.
- **Export** to other formats like PowerPoint and PDF and other systems, e.g. "Prometheus" via the configurable XML exporter.
- **Preview and zoom** your pictures, slides, office and PDF files. Play back audio and video formats from your web browser.
- Import and tag large sets of pictures and data records with **mass importer**, **group editor** or **XML/CSV importer**.
- **Rights management:** Selective and differentiated allowing of rights
- Support for **international character sets** (Unicode), **LDAP interface**, **shibboleth**, etc.
